

Team Name: sdmay24-19

Team Members: Ayden Albertsen, Ben McClannahan, Benjamin Hill, TJ Thielen

Report Period: Sept 11-Oct 24

Summary of Progress in this Period

This period we began to draft a project plan. We had multiple meetings with our client/advisor about what was needed for this process. We decomposed our project into a list of tasks and sub-tasks so that we can easily implement them during the second semester. We also defined our project management style as well. We began to explore database and visualization frameworks to use in our project and put together a visualization prototype using the example data provided by the grad students working on the project. Along with outlining risks, creating a project timeline, and defining milestones we also evaluated each task based on personal effort requirements.

Pending Issues

As of the writing of this report, there are no pending issues to address.

Plans for Upcoming Reporting Period

During the next period we will continue to work on our design document, particularly relating to the design context and decisions.
